Subject: Talc - Rubino Manuscript

Mr. George Lee

Attached are a letter and manuscript received from Professor Rubino.

*G.I.S. has requested
John Rafter to
scrutinize the statistics

The manuscript is intended for publication in the Journal of Occupational Medicine. The manuscript should be scrutinized by our statisticians and reviewed for factual accuracy.

The manuscript, in my opinion, is written in a form and style that is unacceptable to the Journal of Occupational Medicine. I have in mind to send the manuscript when edited for factual accuracy to a science writer who will hold it in confidence and rewrite for the Journal of Occupational Medicine.
